Professional Summary

Backend and AI-focused software developer with strong experience building scalable APIs, AI-powered applications, authentication systems and modern web platforms using Python, FastAPI, PostgreSQL and React. Passionate about backend engineering, database systems, cloud deployment and intelligent software solutions.

Education

University of London, United Kingdom

BSc Computer Science (Expected 2026)
2020 – Present

Technical Skills

Languages

Python, JavaScript, SQL, C++

Backend

FastAPI, REST APIs, Authentication Systems

Frontend

React, HTML, CSS

Databases

PostgreSQL

Tools & Cloud

AI & APIs

OpenAI APIs, NLP, Machine Learning

Projects

AI Transcription Platform

- Built a full-stack AI transcription platform using FastAPI, React and PostgreSQL
- Implemented MP4 upload processing, AI transcription and AI-powered summarization
- Designed authentication and subscription systems
- Integrated OpenAI APIs for intelligent text processing

Decentralized Identity Platform

- Developed blockchain-based identity verification platform
 - Implemented wallet authentication and credential management
 - Built frontend using React and integrated Web3 technologies
-

Relevant Coursework

- Software Design and Development — Grade: 91.04%
 - Advanced Web Development — Grade: 93.75%
 - Object-Oriented Programming — Grade: 100%
 - Databases, Networks and the Web — Grade: 84%
 - Graphics Programming — Grade: 86.88%
 - Agile Software Projects — Grade: 86.66%
 - Programming — Grade: 83.25%
 - Algorithms and Data Structures — Grade: 81%
 - Machine Learning and Neural Networks — Grade: 61%
-

Certifications

- IBM Full Stack Software Developer Professional Certificate — Completed
-

Languages

- English — Proficient in speaking and writing
- Spanish — Basic
